

Roland Mösl

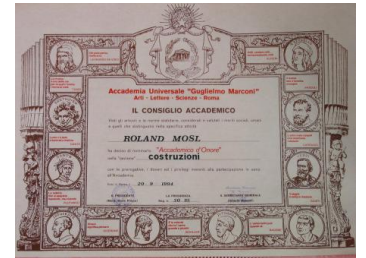

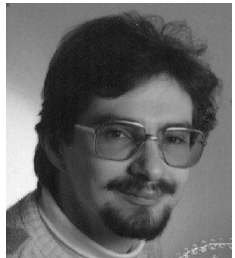

July 9th 1958 Born in Innsbruck - Tyrol - Austria - Europe
 1978 / 1979 Drafted to the military (usual for young man in Austria)
 1979 / 1980 One year IT education in the school computing center Vienna.
 1980 / 1985 Work as an employed programmer, one year at PRZ, three years at Skidata.
 1985 / 1991 I work Self-employed as a programmer.

September 1991 Start project "GEMINI inhabited solar power-plant".
 November 1991 Founding PEGE - Planetary Engineering Group Earth.
 February 1992 Start book project "Advance to solar age".
 November 1993 Introducing the "GEMINI project" at different fairs.
 Award "Merite de l'Invention" from the EUREKA world innovation fair in Brussels.

I printed the 2000 books first edition from "Advance to solar age" at own costs in Croatia, because the publisher wanted only to print 500.
 The publisher Unipress went bankrupt just at this time. I sold 1800 books by my own lines. The few bookshops where I brought the book myself sold it well.

Summer 1994 European order of merit Akademia Guglielmo Marconi: Award for solar energy and construction.

September 1996 First homepage
 April 1997 Development of PEGE.org. The site soon reaches a range of 25 thousand visits per month.
 May 2001 The GEMINI house is the main attraction at the Styria country exhibition about energy.
 (Styria is a district of Austria)

Large expansion of PEGE.org. Thematic sub-domains are built up.
 auto.pege.org and car.pege.org for mobility.
 wohnen.pege.org and live.pege.org for construction, live and energy.
 politik.pege.org and politics.pege.org for Politics and economy.
 notebook.pege.org and laptop.pege.org for mobile computing.
 roland.pege.org about me
 buch.pege.org - my first book in the internet

2004 Increase to more than 100,000 visits per month. I finance the further expansion on advertisements from Google AdSense.

April 2005

Press card from WJC - Vienna Journalist Club. Regular visits at all big fairs like Intersolar, IAA, Geneva motor show, Hannover industrial fair, eCarTec Munich, Munich construction fair, EICMA motorcycle fair.

September 2006

The first electric scooter test.

By early 2012, there are two long-term tests with E-Max-S and E-Max 90S, over 35,000 km in everyday life and some short tests of various electric scooters.

Political actions such as “Equal Rights for All” and “night-time ban for gasoline scooters.”

October 2008

Eurosolar Austria Media award for pege.org

August 2009

I know by Google Alerts about a dramatic interview with Fatih Birol, chief economist of the IEA. Next oil crisis in 2013, extreme prices, supply shortages.

At this time is in Germany election campaign for the parliament. I develop immediately a 10 points manifesto suitable for this oil forecast. But I stand before a wall of silence, the Green perfectly integrated into the wall of silence.

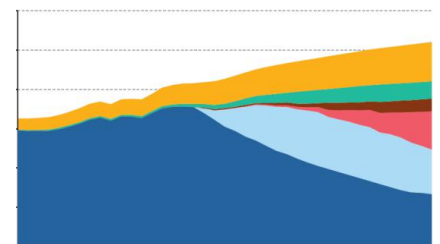

September 2010

Six-year efforts to wake up the politicians in Austria and Germany have a complete surprisingly result:

A government invitation from China to the WEIS 1st World Emerging Industries Summit.

I introduce in my keynote the “PEGE tax transition concept”.

Back in Austria, I stand again in front of the wall of silence.

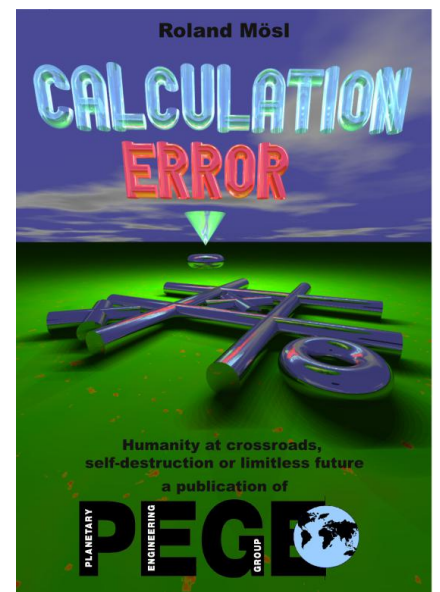

September 2011

Government invitation from China to give at the GELS 1st Global Economic Leaders Summit a keynote. My speech:

We need an international organization for the oil exit.

I receive the “Gusi Peace Prize” in Manila. The prize is also called the “Nobel Prize of Asia”.

With the Gusi peace prize award started also my new book project “Calculation ERROR”.

November 2011
